Other merits

Bachelor thesis project at Swedish Connection Mars 2017 - Jun 2017
Together with the company Swedish Connection I developed
a realtime 3D visualization model of how users move and behave
on one of their websites.

Group project at Försäkringskassan Aug 2016 - Jan 2016
Together with three other students I translated a graph database
of all system dependencies into a 3D visualization.
The tool we created is currently being used by Försäkringskassan.

Professional poker player

2005 - 2010

During the poker boom I made my living playing poker.

These years helped develop my logical, critical and analytical thinking skills.
